

Leverage OpenDaylight in Products & Services

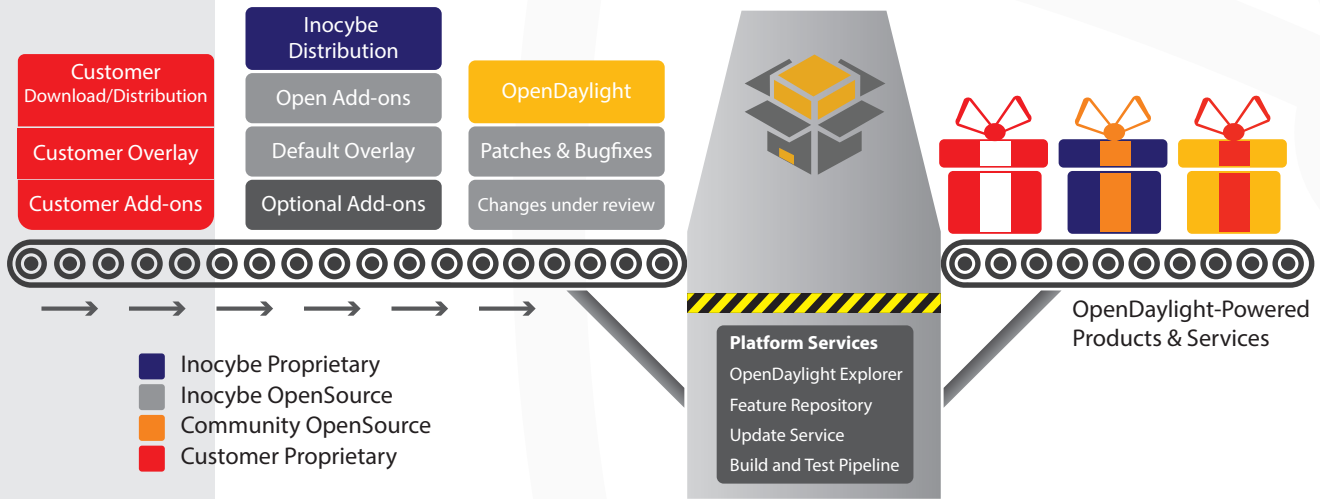

Inocybe Technologies is the Pure-Play *OpenDaylight* company with more than 13% of Global *OpenDaylight* Production Deployments. Our distribution binaries are currently used by our customers around the world within their Operator, Enterprise, and Vendor-based ODL solutions. *Inocybe* offers a robust, commercially supported platform that allows end users to create their own set of *OpenDaylight* solutions, derived from recipe-based use cases, and building upon our vast experience with these customer deployments. *Inocybe* offers platform plans and ODL instance subscriptions that allow us to support our customers' initiatives in their use cases.

Open Networking Platform Plans

The *Inocybe Open Networking Platform* has three versions:

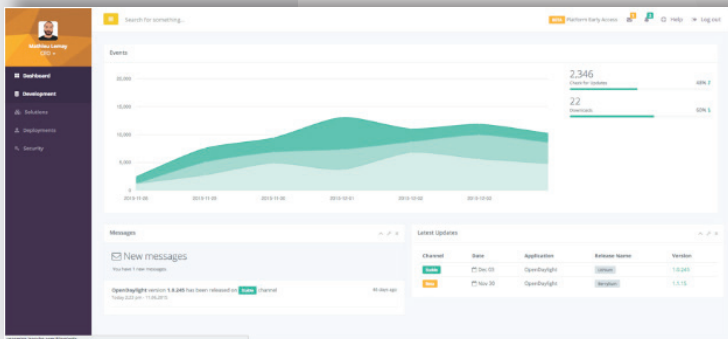

- Enterprise
- Operator
- Vendor

- Commercial Support for *OpenDaylight*
- Create your distribution from a **Recipe**
- Customized Configuration
- User Add-ons & Repositories
- Deployment Management
- Tiered pricing plans based on Recipes, Support, Distribution and Custom development needs
- Annual subscription for Platform + Instances

Inocybe Platform User Interface

The *Inocybe Platform* User Interface is a versatile interface for creating and managing *OpenDaylight* distributions and builds using recipes of components. The UI presents a Dashboard to the user when first logging in to manage instance deployments and product updates. The platform fully manages an end-to-end CI/CD process for supported ODL builds.

Key Features

- Manage production instance deployments
- Understand latest product updates and changes
- Add new features and repositories as required
- Manage builds and perform tests on every change
- Distribution is automatically available for download
- Create recipes to build solution on multiple streams
- Test and prepare for next releases

OpenDaylight Deployment

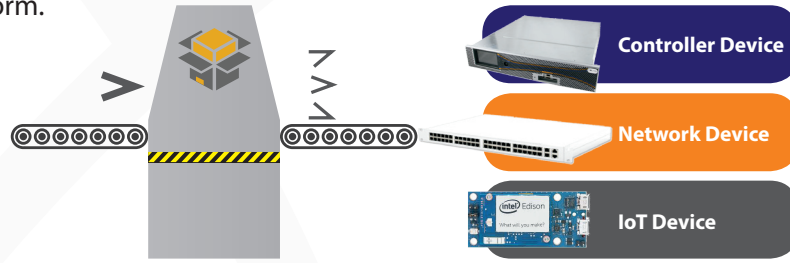

Customers can customize our core *OpenDaylight* binaries/artifacts to make distributions that can be deployed to any part of the networking stack for devices, open controller appliances, whitebox switches or commodity servers for as long as they are subscribed to our platform.

ODL Components

- Netconf
- MD-SAL
- Neutron
- SNMP

FD.IO

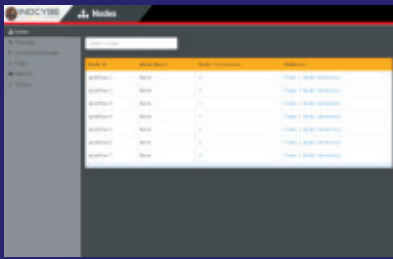

- VPP
- Honeycomb
- TLDK
- ONE

Add-ons

Inocybe has developed value-add proprietary components made available as optional add-ons to our subscribers as part of their platform experience.

Cluster Management UI

Manage your cluster environment via a graphical interface

Metrics & Operations

Operational Dashboard with MD-SAL transaction metrics & view of OpenDaylight in production environments

Security Management

Manage security such as RESTConf certificates, OpenFlow TLS, and Users

OPEN NETWORKING PLATFORM PLAN

ENTERPRISE

OPERATOR

VENDOR

Description	Perfect plan for enterprises to have a supported out-of-the-box <i>OpenDaylight</i> distribution	Suited for operators with their own use cases and ODL customization to build upon a supported platform	For vendors wanting to build products or solutions that embed <i>OpenDaylight</i>
Recipes (Use Cases)	1-10	1-10	1-10
